XerCise Knowledge Base

Official Product Specifications, Customer Support Guidelines & Technical Architecture

1. BRAND OVERVIEW & MISSION

XerCise is a premium fitness ecommerce platform built for athletes, bodybuilders, and fitness enthusiasts. We provide rigorously tested nutritional supplements, clean protein formulations, ultra-micronized performance enhancers, and targeted diet staples designed to optimize recovery, hypertrophy, and daily athletic output.

Quality Assurance

Every batch undergoes strict third-party heavy metal and purity screening. Our formulations are free from banned substances, artificial fillers, and undisclosed proprietary blends.

Customer Promise

Transparent labeling, science-backed dosages, and seamless digital purchasing backed by AI-guided customer support and secure multi-tier payment gateways.

2. CORE PRODUCT CATALOG & SPECIALTIES

Product Line	Key Ingredients & Specs	Specialty / Primary Benefit
XerCise Pure Whey Isolate	100% Hydrolyzed Whey Protein Isolate, 28g Protein, 0g Sugar, 0.5g Fat per serving.	Rapid absorption post-workout; zero bloating; supports lean muscle protein synthesis.
XerCise Micronized Creatine Monohydrate	100% Pure HPLC Tested Creatine Monohydrate (200 Mesh ultrafine grind).	Enhances ATP cellular energy, increases maximum strength output, and accelerates muscle cell volumization.
XerCise Plant Pro-Blend	Organic Pea, Brown Rice & Hemp Protein matrix fortified with BCAAs and digestive enzymes.	Complete amino acid profile for vegan athletes; ultra-smooth texture and easy digestion.
XerCise Clean Mass Gainer	Complex carb blend (Oat flour, Sweet Potato) + Fast/Slow protein matrix (50g protein, 650 kcal).	Designed for hardgainers seeking clean surplus calories without refined sugar spikes.

Dietary Stuffs Note: XerCise also offers specialized diet staples including organic peanut butter spreads, MCT oil energy drops, electrolyte replenishment powders, and zero-calorie flavoring drops.

3. SECURE PAYMENT INFRASTRUCTURE

XerCise integrates robust, PCI-DSS compliant payment gateways to guarantee safe transactions globally. Customers can check out seamlessly using multiple payment options tailored for local and international convenience.

Supported Payment Methods

Credit / Debit Cards: Visa, MasterCard, American Express, Discover.
Digital Wallets: Apple Pay, Google Pay, Shop Pay for 1-click checkout.
Alternative / BNPL: Klarna & Afterpay (4 interest-free installments), Cash on Delivery (COD) for verified regional accounts.

Security & Encryption

All transaction data is tokenized and encrypted via TLS 1.3 protocol. XerCise servers never store raw credit card numbers, ensuring complete compliance with financial regulatory standards.

4. AI CHATBOT GUIDE & PURCHASE ASSISTANT PROTOCOLS

The XerCise AI Chatbot ("XerBot") is embedded across the web app to guide users through product selection, supplement stack creation, checkout troubleshooting, and shipping status tracking.

User Intent / Query	Chatbot Automated Response & Action	Fallback / Escalation
"What protein should I buy for cutting?"	Recommends *XerCise Pure Whey Isolate*, detailing its 0g sugar count and explaining caloric deficit integration. Offers a 10% bundle discount code.	Connect to human fitness advisor via live chat.
"How should I load Creatine?"	Explains standard protocol (5g daily for maintenance or 20g split across 5 days for fast loading) with plenty of hydration reminders.	Sends PDF link on creatine science.
"Where is my order #X1094?"	Queries Supabase database via secure API endpoint and returns real-time tracking status and courier delivery estimate.	Create support ticket for shipping carrier inquiry.

Chatbot Tone & Guardrails: XerBot maintains an encouraging, professional, and science-backed tone. It explicitly avoids diagnosing medical conditions and directs users to healthcare professionals for clinical nutritional needs.

5. TECHNICAL ARCHITECTURE & DATABASE DESIGN

The XerCise web application is architected for ultra-low latency, high availability, and responsive modern UI/UX design (utilizing Tailwind CSS, React/Next.js framework principles, and modular component structures).

Supabase Integration (Backend & Storage)

Database: PostgreSQL hosted on Supabase handling users, products, cart items, orders, and product reviews.
Storage Buckets: Public buckets configured for high-res product imagery, customer review photos, and downloadable fitness guides.
Security: Row Level Security (RLS) policies enforce strict data isolation so users can only modify their own carts and order histories.

Vercel Deployment Pipeline

Hosting: Deployed seamlessly on Vercel with global Edge Network distribution.
CI/CD: Automatic preview deployments on GitHub pull requests and instantaneous production builds on the `main` branch.
Performance: Optimized server-side rendering (SSR) and incremental static regeneration (ISR) for lightning-fast catalog browsing.

6. UI/UX DESIGN SYSTEM SPECIFICATIONS

The XerCise interface embodies an energetic, clean, and high-contrast dark/light aesthetic tailored for fitness commerce. Key pillars include:

Visual & Interaction Design

Color Palette: Deep Charcoal slate background (`#0f172a`), Electric Cyan primary accents (`#0284c7`), and Vivid Green success markers (`#22c55e`).
Typography: Clean sans-serif hierarchy emphasizing readability on mobile and desktop viewports.
Micro-interactions: Smooth hover states on product cards, instant filter toggling for supplements, and sticky cart drawers.

Customer Review Engine

Verified buyer badges, star rating breakdowns (taste, mixability, efficacy), photo upload support stored via Supabase, and helpfulness voting.
Sorting & Filtering: Filter reviews by fitness goal (bulking, cutting, endurance) and flavor preference.
